Introduction

APContent is the ultimate eLearning software with advanced video recording and editing features. It allows you to create various eLearning content types such as video demos, software simulations, quizzes, and games. Using responsive design and HTML5, your content is truly device-independent – it looks good and runs perfectly on any modern web browser and device. The SCORM- and xAPI-compliant outputs also integrate seamlessly with the most well-known Learning Management Systems.

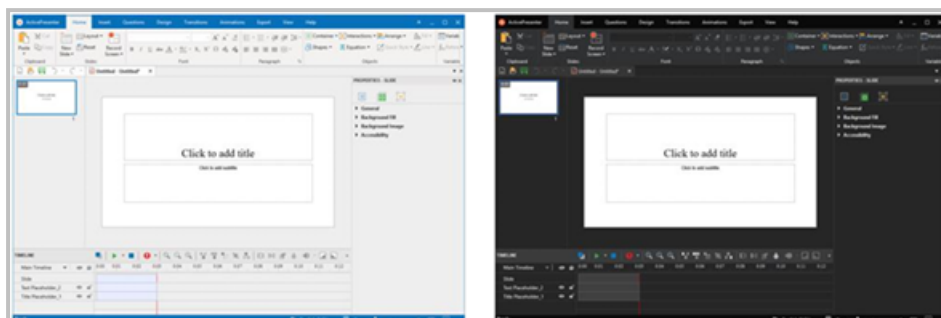

UI Theme

ActivePresenter 7 supports both light theme and dark theme for your liking, which lets you customize your look and feel. On the first launch after you successfully installed ActivePresenter 7, this dialog will appear:

Workspace

ActivePresenter workspace also comes up with the theme that you've chosen. To change the look of the workspace from light to dark and vice versa, click the **View** tab > [UI Theme](#).

Creating Projects

A blank project is a project that contains blank slides where you can add content such as images, video/audio clips, and slides from ActivePresenter projects or PowerPoint presentations. You can also add new recorded slides to a project by recording screen as video or as software simulations.

- To create a blank project, on the Start Page > **Blank Project**. Alternatively, in the open project window, click the **ActivePresenter** button > **Blank Project**. ActivePresenter will launch a new project with the default theme.
- By default, the new project will have one blank slide with the layout corresponding to the theme. You can add more slides by clicking the **Home** tab > New Slide, or in the Insert tab > New Slide. The new slide will be inserted after the slide that you are selecting.

If you want to create a new slide with a different layout, click the arrow on the New Slide button and select a slide layout from the drop-down list.

Recording Projects

You can use ActivePresenter to record the computer screen to create a video demo to show how your products or services look like. A recorded project captures truthfully all live actions on the screen along with mouse and keyboard actions while you are interacting with the target application.

To record a new project, do one of the following:

- On the Start Page, click [Record Video](#).
- In the open project window, click the ActivePresenter button > Record Video.
